THE LEADERS' BULLETIN

June 2017

IN THIS ISSUE

- * From Lead 6 & 7
- * Your Master Resilience School
- * Your Proponent Development Integration Division
- * Your Physical Fitness School
- * Task Force Marshall
- * Your Leadership School
- * The Army Student Detachment

KEY PERSONNEL

- Leader Training Brigade**
Commander
803-751-3200
Command Sergeant Major
803-751-7063
- Proponent Development and Integration Division**
Director
803-751-6511
- Initial Military Training Leadership School**
Commandant
803-751-3359
Deputy
803-751-5722
- U.S. Army Physical Fitness School**
Director
803-751-9757
- Task Force Marshall**
Commander
803-299-1165
Command Sergeant Major
803-299-1162
- U.S. Army Master Resilience School**
Director
803-751-1812
- Behavioral Health Team**
Psychologist (DSA)
803-751-0744

FROM LEAD 6 & 7

The Leader Training Brigade (LTB) strengthens the Army by training its leaders to succeed now with a core focus on leadership, resilience, and physical fitness. The Brigade is a proud part of the Center for Initial Military Training (CIMT). As a member of the CIMT enterprise effort, it is important for us to be a trusted team for leadership solutions to the force. We do this best when we improve leader performance by providing consistent world-class training, upholding the Army Profession and its Core Values, and remaining relevant in our endeavors by actively adapting to the future.

The bulletin is a forum to publish best practices, lessons learned, and other important professional information. Just like there is actionable intelligence, our aim for the bulletin is to provide you, the leader, with actionable and meaningful information. As an enterprise endeavor, we will reach out to you for thoughts on content and contributions to the bulletin.

Please allow us to now introduce our team to you.

YOUR MASTER RESILIENCE SCHOOL

All leaders want to discover and make available the tools that can help us and our subordinate leaders do more, gain more, achieve more, and be more. One major component in the Army that excels in the art of resilience and enhances leadership across the

force is the U.S. Army Master Resilience School (USAMRS). The School's experts teach students skills that enhance performance and build resilience. This enables individuals to grow and thrive in the face of challenges and bounce back from adversity. The core competencies gained at the School allow our Soldiers to develop stronger and better leaders by building mental toughness. The initial and enduring concept behind the program is simple: it's about much more than being physically fit; it's just as much if not more about mental and emotional strength.

YOUR PROPONENT DEVELOPMENT INTEGRATION DIVISION

The Proponent Development Integration Division (PDID) is responsible for ensuring all resources (facilities, ammunition, TADSS, manpower, and equipment) associated with each respective Program of Instruction (POI). PDID performs as the proponent manager for Basic Combat Training (BCT), Prior Service BCT, Drill Sergeant Program, and the Navy Individual Augmentee Combat Training. PDID also manages instructional strategies and training products for Advanced Individual Training Platoon Sergeant Program, Initial Military Training Leader Education and Training, and the Army Physical Readiness Training. One important initiative by PDID is the enactment of a new POI review strategy. The new strategy turns command and control of the POI review process to the command teams that execute the training by: soliciting input from command teams and drill sergeants upfront; creating a feedback loop to continually assess the information; creating corroboration between the training centers; and finally, creating synergy and consensus among the four training centers that results in enhanced updates to the POI. As some of you already know, we are in the initial phases of the BCT POI Review and the input from the centers has so far been outstanding.

YOUR PHYSICAL FITNESS SCHOOL

The U.S. Army Physical Fitness School (USAPFS) serves as the expert agency for the Army on physical fitness, physical readiness, and physical training programs. The USAPFS coordinates on behalf of CIMT on initiatives involving the improvement of physical fitness as well as programs and initiatives that affect physical health. The School's edge lies in the cadre's relentless endeavor to improve all aspects of the curriculum through individual and joint study/development. This pursuit of excellence allows them to transform the Army's approach towards physical readiness training through the knowledge and application of exercise and sport science.

TASK FORCE MARSHALL

There are thousands of Sailors serving "boots on ground" while performing various specialized jobs in the CENTCOM and AFRICOM theaters of operations. Of these Sailors, many of them are Individual Augmentees (IA) filling joint or Army positions and leave their assigned unit or command to deploy individually or with a small group. In an effort to ensure that these Sailors receive the training they need prior to deployment, IAs receive basic combat skills training from Task Force Marshall (TFM). Task Force Marshall, based at the McCrady Training Center, Eastover, SC, prepares Sailors for deployment through 13 days of continuous training designed to teach individuals basic required skills prior to deployments overseas. Since 2006, TFM has trained over 31,000 Sailors.

Please note that the Acronyms are in order as displayed in this document.

ACRONYMS

- DSA - U.S. Army Drill Sergeant Academy
- LTB - Leader Training Brigade
- CIMT - Center for Initial Military Training
- USAMRS - U.S. Army Master Resilience School
- PDID - Proponent Development Integration Division
- TADSS - Training Aids, Devices, Simulators, and Simulations
- POI - Program of Instruction
- BCT - Basic Combat Training
- TRADOC - Training And Doctrine Command

YOUR LEADERSHIP SCHOOL

One of the Brigade's major mandates is to train and develop leaders. Our key asset in this endeavor is the Leadership School. The Leadership School provides mission command, education, and training in support of transforming volunteers into Officers and Soldiers in the Army. The School also prepares leaders to effectively command through CIMT's two flagship courses: the Pre-command Course (PCC) and the Company Commander and First Sergeant Course (CCFSC). The Leadership School's goal in the end is to help command teams increase their Initial Military Training (IMT) situational awareness so they are effective immediately upon assuming command and bring success to their formations and the Army.

THE ARMY STUDENT DETACHMENT

The U.S. Army Student Detachment (USASD) provides centralized operations through one-on-one assistance to over 2,000 active duty/reserve Officers and NCOs attending over 350 universities, service schools, and industry locations worldwide. Their two main pillars of support as you may know are human resource and finance services. If you or anyone you know has attended advanced civil schooling, a degree completion program, a fellowship, or graduate program, then you are familiar with the mission and contributions of the USASD.

Our value lies in our ability to help leaders: decide with speed and conviction; adapt proactively; engage for impact; and most important of all, deliver reliable positive results. The brigade's raison d'être is to improve leader performance across the Army. As you have read, we are uniquely postured to support your organization.

"Please share this information (particularly with your organizational leaders) and send any feedback to the LTB's mailbox (usarmy.jackson.93-sig-bde.mbx.ltb@mail.mil) so that we may improve these training products."
